STATINTL

Dear [REDACTED]

Thank you for your letter of March 5 concerning the service and utility problems experienced by your agency during occupancy of the Magazine Building in Rosslyn, Virginia.

I am submitting a copy of the Bolt Beranek and Newman report to our engineers in the Design and Construction Division for review and their recommendations for corrective action required to eliminate the noise problem on the tenth floor.

At the same time I have requested a full report from our Region Three Buildings Operation Division of their maintenance and cleaning experience in this building since the lease inception.

As Commissioner Sampson stated in his letter, I am taking a personal interest in this matter. It is expected that a full reply to your letter, along with our proposals for resolution of these problems, will be forwarded to you within thirty days.

Sincerely,

Larry L. Louch
